

**Todd Mayne, AIA, LEED AP BD+C**  
***Weber Thompson***

Weber Thompson Principal Toddy Mayne is a Construction Administration Specialist with a focus on mass timber, and other construction technologies in complex mid rise and high rise commercial and residential buildings.

Todd excels at bringing designs to life by balancing design intent and the application of technology to achieve real world solutions. He is a sought-after mentor for both his approach to his projects and for his depth of knowledge on technical matters.

His construction administration management is marked by a focus on relationship management, specifically Todd's collaboration with internal and external stakeholders

throughout the life of a project.

Todd's award-winning projects include the mass timber commercial buildings 35 Stone and the award-winning Northlake Commons, award-winning residential high rises Nexus and Kiara, as well as the currently under-construction Sloane tower. Todd has also presented at the International Mass Timber Conference on the benefits of Dowel Laminated Timber, versus Cross Laminated Timber.
